

BROOKFIELD INSIDER

FEBRUARY 2023

E-Newsletter for the Month of February 2023

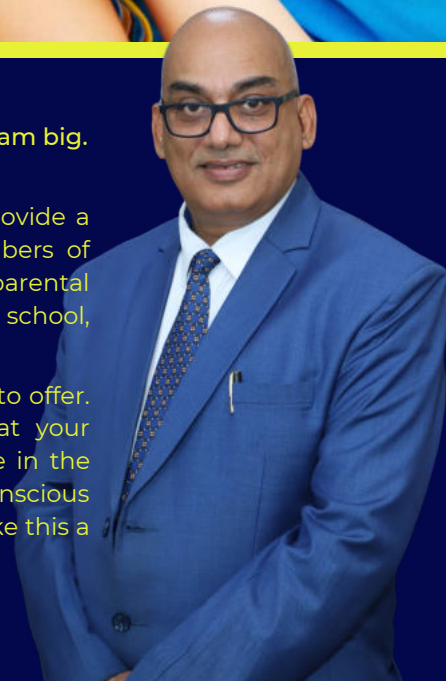

Dear Parents and Students,

"You cannot dream of becoming something you do not know about. You have to learn to dream big. Education exposes you to what the world has to offer, to the possibilities open to you."

I would like to remind everyone of Brookfield International School's mission -which is to provide a holistic education that will prepare students to become responsible and successful members of society. I would also like to take this opportunity to emphasize the importance of parental involvement in their child's education. We believe that education is a partnership between the school, parents, and students.

To my students, I encourage you to take advantage of the opportunities that this school has to offer. Get involved in extracurricular activities, challenge yourself academically. Remember that your education is a journey, and it is up to you to make the most of it. We aspire you to believe in the school's philosophy of Integral Education and work towards excellence by constant Conscious Transformation, so that you stand in good stead in every situation. Let us work together to make this a year of growth and achievement for our students.

Regards
Dr Jay Kumar Singh
Founder Principal

BROWN COLOUR DAY CELEBRATION

Colours are some of the earlier words that children tend to learn and a means they can use for learning. It's important to incorporate them into their daily activities because children remember colours better than verbal cues. Combining content with colourful visuals improves their memorization. Children learn from a young age to associate colours with particular objects. For instance, they often associate red with apples, yellow with the sun, blue with the sky etc. Exposing children to different shades of colours can help them make important connections and expand their vocabulary because colours help to assess, estimate and define an object.

The colour we picked up from the palette for February month was Brown as Brown is associated with chocolates and Teddy Bears. Our little munchkins came dressed up in brown attires on 3rd February. They did brown colour craft activities and played 'I Spy' in the class to find brown colour objects. Later children enjoyed brown colour goodies they had brought in their tiffin.

PARENTS TEACHER MEETING

Parents teacher meetings provide a chance to talk about a child's social, language, and cognitive development in all. For many parents, this conference provides the first opportunity to sit down one-on-one with their child's teacher to talk about how things are going.

Where teachers have information and work samples to share, it's equally important for parents to share their impressions of their child's school experience, and to have any questions answered. This is one reason we regularly organise such parent-teacher conferences. The kindergarten wing had PTM on 4th February, Saturday to discuss the strengths and areas of concern of the students.

SAFAL ASSESSMENT

ORGANISED BY

C.B.S.E

सफल

"Nothing is impossible
The word itself says
'I m possible'"

Brookfield International school organized SAFAL (Structured Assessment for Analyzing Learning) Exam on 9th February 2023 . CBSE launched Structured Assessment for Analyzing Learning (SAFAL), a competency-based assessment for Grades 3, 5 and 8 to assess the progress of foundational skills and basic learning outcomes/competencies among students.

SAFAL, as a diagnostic assessment, will provide developmental feedback to schools and teachers to improve teaching-learning without additional examination pressure on students. It has been designed to help students, parents, and teachers to track learning progress throughout the school years. All the students from grades 3 to 8 took the examination enthusiastically.

BACCHA PARTY @BFIS

*Take me out on a Picnic
Take me outside to play
It's fun to eat when you're outside
We'll run, we'll laugh and we'll play.
'cause it's so much fun to be out, on a Sunny Day !*

On 24th February, our little ones enjoyed a Picnic out in the sun, in our lush green lawns. They had a nature walk, train ride, and fun games with their class friends. Eating out in the open, they relished the picnic stuff that their mothers had beautifully packed especially for them. It was a fun-filled day marked with dancing, singing and playing fun games.

BLESSING CEREMONY FOR BOARD CANDIDATES

THE GREATEST WEAPON AGAINST STRESS IS OUR ABILITY TO CHOOSE ONE THOUGHT OVER ANOTHER!!

This statement holds very true in today's scenario where everyone is in constant bafflement and riddles, where every moment is a testing moment and where running hands of the clock reminds us that we have to run and bear loads of responsibilities and live up to the expectations of everyone around us. All these situations create and lead to stress and strain in life.

In order to help the students to learn to cope with the stress they are facing during the **Board examination** preparation time, a workshop was held in the school on 20th February, conducted by the **Founder Principal, Dr JK Singh**. The main highlights of this workshop were – various types of stress faced by teenagers, stress relaxation therapy that could be followed and different stress management techniques. The workshop concluded with big smiles on the faces of students and with a promise to deal with stress in a positive way. After the workshop, a blessing ceremony for the students appearing for Board Examination was also conducted .

NATIONAL SCIENCE DAY

Science helps children develop key life skills, including the ability to communicate, remain organized and focused, and even form their own opinions based on observation. Science also helps children develop their senses and overall awareness.

Children are hands-on learners, and the world around them provides so many natural opportunities. Interacting with their environment will support their intellectual development. They are primed for learning, and what they learn while they're young can impact their interests later in life. Students begin to develop an interest in science, technology, engineering, and mathematics (STEM) during their elementary years. Having an interest and knowledge in these subject areas provides future career opportunities. The pre-primary wing celebrated National Science Day on 28th February. Children enjoyed hands-on activities to learn about some scientific concepts. Teachers of different grades showed them some interesting science experiments like changing colours, transfer of energy and combustion; to introduce our little ones to the amazing world of science.

VISIT OF CIVIL JUDGE

"Ethics is knowing the difference between what you have a right to do and what is right to do."

Honourable civil judge Sh. Baljinder Singh paid a visit to Brookfield International School on 20th February 2023 in order to sensitise teachers about District Legal Service Authority.

Sir had a very informative interaction with teachers about various schemes run by the government for the upliftment of society. He also informed that how people can take advantage of the schemes and what role educators can play to make people aware of the same. It was an enlightening and interactive session.

WORKSHOP ON TRAFFIC RULES AND SAFETY

A workshop on traffic rules and road safety was conducted for the students on 23rd Feb 2023 at Brookfield International School, as a part of an ongoing Road Safety Campaign. Assistant Sub-inspector Shri. Janak Raj sensitised the students about traffic rules and highlighted the purpose of road safety. Traffic rules and road safety measures such as wearing a seatbelt, not using mobile phones while driving, maintaining speed limit, etc. were discussed with the students. Precautions while riding a bicycle were also elucidated such as putting reflective mirrors, not riding very fast, wearing a helmet and looking for traffic signs carefully. Overall, it was an interactive and informative session that helped in inculcating a sense of road safety among the young citizens of our country.

SPORT-A-THON

ANNUAL SPORTS MEET FOR PRE-PRIMARY WING

School sports days offer the perfect opportunity to encourage children to participate in sporting activities for fun. The games played at sports day can go beyond traditional events such as running and include entertaining games such as the Tower building race, bunny race etc.

Playing sports help children to develop their gross motor and social skills and helps to set them up for positive relationship building for life. Through an event like a sports day children get the chance to show leadership, teamwork and communication skills, as they interact with new people and face new challenges. With changing weather and warm sunny days it was time for our Pre-primary children to have their annual sports meet **Sport-A-Thon**. On the 9th & 10th of February different grades of **pre-primary wing** participated in many fun games like hoola hoop bridge building, show the way, ball buddies and match the colours. The event started with the March past, torch run, team games as well as individual hurdle races and ended with a mesmerizing dance performance by UKG kids.
